Software Developers for CHORA A/S in Aarhus

Does end-to-end software development projects within the realm of communications solutions for Electronic Warfare sound interesting? Chora A/S is looking for Software Developers for our office in Aarhus.

Your Role

In this position, you will contribute to the development of mission critical communication equipment used by military and defense units across the world. Your focus will be on the software elements of the products, which include system and database design, GUI design and geographical information systems on client-server architecture.

You will participate in new product development projects as well as projects relating to optimization, expansion and maintenance of existing products and features. Your tasks and responsibilities include:

- Systems and application design for Linux and Windows
- Back-end and front-end coding using C, C++ and C#
- Test and documentation of software solutions

Knowledge of cyber and reverse engineering is an advantage but not a requirement. For instance, you could have knowledge of low-level machine code, disassembly, and vulnerability research.

You will join a team of passionate Software Engineers, who handle development processes ranging from requirements assessment, initial analysis and design, coding, implementation, and testing. The team works with a wide range of technologies including Python, GIT, WPF etc. However, the most applied technologies are C++ and C#. The Scrum methodology is used for organizing tasks and projects.

Your Profile

Preferably, you have a master's degree in computer science or a similar field, and you have hands-on experience with designing and programming software. Whether you are a senior or a graduate candidate is irrelevant – depending on your seniority, you will be met with the suitable level of support and professional challenges.

You enjoy working closely with your colleagues as well as independently, and you communicate fluently in English and Danish.

As part of the recruitment process, you will go through a mandatory security clearance by the Danish authorities, which requires that you have a clean criminal record, you are a Danish citizen or you have lived in Denmark for at least the last 7 years.
